

Jairo T. Moura was born in Rio de Janeiro, Brazil. He received the M.S. Degree in Mechanical Engineering in 1990 from the Catholic University of Rio de Janeiro (PUC-RJ), and his Ph.D. in Mechanical Engineering with emphasis in Dynamic Systems and Control in 1997 from the University of Connecticut, Storrs. He joined Brooks Automation immediately after his Ph.D., where he has been working in product development since then. His research interests include motion control algorithms, parameter identification, magnetic levitation technology, embedded systems and robot mechanisms. Jairo is currently leading the Controls group in the Advanced Technology Development organization at Brooks Automation Inc. in Chelmsford, Massachusetts - USA.
