ATTENTION ENGINEERING STUDENTS!

Two M.S. Degrees from Politecnico di Milano and UConn

A great opportunity to study one year in Milan.

Benefits
• No tuition while abroad
• 850 Euro/month, travel 850 Euro
• Opportunity to globalize your engineering credentials

Overview
• One year of M.S. study at UConn, plus
• One year of study at the Politecnico di Milano, Italy
• Earn 2 advanced degrees; one from UConn and the other from Polimi
• Learn to approaching global engineering problems and devise solutions using multidisciplinary approaches

Eligibility
• Current Plan a M.S. or Ph.D. students in his/her first year OR
• Current senior in Engineering B.S. program accepted to the University for graduate studies
• Minimum 3.0 GPA
• Language knowledge is preferred but it is not required

Partner Institution
Politecnico di Milano, Italy
• The first and largest technical university in Italy
• Top 50 best technical university worldwide
• Trains engineers, architects, and industrial designers

Politecnico di Milano
With 40,000 students, Politecnico di Milano is Italy’s largest institution for Engineering, Architecture and Industrial Design and it is ranked as one of the most outstanding European universities in its fields.

The university has seven campuses located in Milan and in other nearby Italian cities. It is organized in 12 Departments, devoted to research and in 4 Schools, devoted to education.

Many programs are entirely taught in English, thus attracting an ever-increasing number of talented international students, who form a diverse community from more than 100 countries.

Politecnico di Milano is member of IDEA League, a strategic alliance among five leading European universities of technology that aims to educate a new generation of Engineers with extra-curricular activities for selected, highly talented students.
