The School of Engineering in collaboration with the Graduate School CLAS and the Center for Career Development presents a seminar by Cynthia Fuhrmann:

**The Individual Development Plan: Strategically Navigate your Scientific Career**

This presentation will help plan your graduate students’ academic career. This workshop is designed to prepare scientists for creating Individual Development Plans, with practical strategies for evaluating career options, setting achievable goals, engaging mentors, and adapting to change as your plan progresses.

Cynthia Fuhrmann is a co-author of the interactive career planning website myIDP. She is the Assistant Dean of Career & Professional Development in the Graduate School of Biomedical Sciences at the University of Massachusetts Medical School. There, she leads efforts to integrate career planning and professional development programs into the UMMS PhD and postdoctoral training experiences.
