

Mukul S. Bansal

CONTACT INFORMATION

Department of Computer Science & Engineering
University of Connecticut
371 Fairfield Way, U-4155
Storrs, CT, USA

Phone: (+1) 860-486-2572
Email: mukul.bansal@uconn.edu
Webpage: <http://www.engr.uconn.edu/~mukul>
Lab Website: <http://compbio.engr.uconn.edu/>

RESEARCH INTERESTS

Computational biology and **bioinformatics**, with a focus on computational phylogenetics and comparative genomics; **Algorithms** and **combinatorial optimization** in general.

EDUCATION

Postdoctoral Associate, January 2011 – August 2013
Computer Science and Artificial Intelligence Laboratory
Massachusetts Institute of Technology, Cambridge, USA
Postdoc Advisors: Manolis Kellis and Eric J. Alm

Postdoctoral Fellow, July 2009 – December 2010
The Blavatnik School of Computer Science
Tel Aviv University, Tel Aviv, Israel
Postdoc Advisor: Ron Shamir

M.S. and Ph.D. in Computer Science, Fall 2004 – Summer 2009
Department of Computer Science
Iowa State University, Ames, Iowa, USA
Advisors: David Fernández-Baca and Oliver Eulenstein

B.Tech. in Computer Science, 2000 – 2004
Department of Computer Science and Engineering
International Institute of Information Technology, Hyderabad, India

EMPLOYMENT HISTORY

Assistant Professor: *August 2013 – Present;* Department of Computer Science and Engineering, University of Connecticut, USA.

Postdoctoral Associate: *January 2011 – August 2013;* Computational Biology Research Group, Computer Science and Artificial Intelligence Laboratory, Massachusetts Institute of Technology, USA.

Postdoctoral Fellow: *July 2009 – December 2010;* Algorithms for Computational Genomics Group, The Blavatnik School of Computer Science, Tel Aviv University, Israel.

Visiting Graduate Student: *Summer 2007;* Michael Sanderson's Lab, Department of Ecology and Evolutionary Biology, University of Arizona, USA.

Research/Teaching Assistant: *Fall 2004 – Summer 2009;* Department of Computer Science, Iowa State University, USA.

OTHER APPOINTMENTS AND AFFILIATIONS

- **Faculty Member:** The Institute for Systems Genomics (ISG), University of Connecticut.
- **Faculty Affiliate:** The Center for Microbial Systems, Ecology and Evolution (CMSEE), University of Connecticut.

RESEARCH FUNDING

- 2/2016–1/2021** Principal Investigator, *CAREER: Algorithms for Domain-Level Analysis of Gene Family Evolution*. \$499,576, National Science Foundation, USA.
- 8/2016–8/2019** Principal Investigator, *Understanding Horizontal Gene Transfer in Bacteria and Archaea: Units of Transfer and Modes of Integration*. \$598,801, National Science Foundation, USA.
- 8/2016–7/2019** Co-Principal Investigator (PI: Ion Mandoiu), *Collaborative Research: Algorithmic Techniques for Inferring Transmission Networks from Noisy Sequencing Data*. \$199,999, National Science Foundation, USA.
- 9/2016–8/2019** Principal Investigator, *Collaborative Research: Integrating the geological and genomic records: time-calibrating Earth's dynamic biogeochemical history*. \$316,714, National Science Foundation, USA.

SELECTED RECENT AWARDS AND HONORS

- 2/2016** Recipient of NSF CAREER award
- 7/2016** Named *UTC professor of engineering innovation* for research excellence
- 2015, 2016** Received UConn provost's commendation for teaching excellence

MANUSCRIPTS UNDER REVIEW

- [43] M. S. Bansal, M. Kellis, M. Kordi, and S. Kundu “RANGER-DTL 2.0: Rigorous Reconstruction of Gene-Family Evolution by Duplication, Transfer, and Loss”.
- [44] S. Kundu and M. S. Bansal, “On the Impact of Uncertain Gene Tree Rooting on Duplication-Transfer-Loss Reconciliation”.

SOFTWARE PACKAGES

- **RANGER-DTL**: (<http://compbio.engr.uconn.edu/software/RANGER-DTL/>) Short for Rapid ANalysis of Gene family Evolution using Reconciliation-DTL, this is a software package for inferring gene family evolution by speciation, gene duplication, horizontal gene transfer, and gene loss. RANGER-DTL v2.0 implements the algorithms presented in refs. [29],[7], [24], and [25], and makes it possible to perform rigorous evolutionary analyses of even large gene families with thousands of taxa while accounting for confounding factors such as gene tree uncertainty, uncertain rooting, and multiple optima.
- **SEADOG**: (<http://compbio.engr.uconn.edu/software/seadog/>) Short for “Simultaneous Evolutionary Analysis of DOMains and Genes through phylogenetic reconciliation”, this is a software package for simultaneous inference of domain-level and gene-level evolution through a joint phylogenetic reconciliation of domain, gene, and species trees. The software implements the Domain-Gene-Species (DGS) reconciliation model described in ref. [23]. SEADOG was programmed by Lei Li.

- **RF-Supertrees**: (<http://genome.cs.iastate.edu/CBL/RFsupertrees/>) This is a fast and accurate supertree program for rooted phylogenetic trees. RF-supertrees implements efficient search algorithms described in ref. [16] and constructs a supertree that minimizes the total Robinson-Foulds distance between the supertree and the input trees.
- **DupTree**: (<http://genome.cs.iastate.edu/CBL/DupTree/>) This is a tool box for constructing species phylogenies from genome-scale multi-locus data using gene tree parsimony. DupTree implements the fast local search algorithm from ref. [40] and was programmed jointly with André Wehe.
- **TreeFix**: (<http://compbio.mit.edu/treefix/>) This is a program for very accurate reconstruction of eukaryotic gene trees. It takes as input a maximum likelihood gene tree topology, a known species tree, and a multiple sequence alignment for the gene family and computes a more accurate gene tree topology using the approach described in ref. [10]. TreeFix was programmed by Yi-Chieh Wu.
- **TreeFix-DTL**: (<http://compbio.mit.edu/treefix-dtl/>) This is a program for very accurate reconstruction of prokaryotic gene trees. Like the program TreeFix above, it takes as input a maximum likelihood gene tree topology, a known species tree, and a multiple sequence alignment for the gene family and computes a more accurate gene tree topology while accounting for horizontal gene transfer, gene duplication, and gene loss as described in ref. [4]. TreeFix-DTL was programmed by Yi-Chieh Wu.
- **DupLoss** and **DeepC**: (<http://genome.cs.iastate.edu/CBL/iGTP/>) These programs extend on the program DupTree and make it possible to construct species phylogenies, from genome-scale multi-locus data, under the duplication-loss and deep coalescence cost models respectively. They implement the local search algorithms described in ref. [33] and are available as part of the iGTP [15] package.
- **HiDe**: (<http://acgt.cs.tau.ac.il/hide/>) Short for Highway Detection, HiDe is a software package for inferring highways of horizontal gene transfer (representing large-scale horizontal transfer of genes) in the evolutionary history of a set of species. HiDe implements the highway detection method described in ref. [9] and was programmed by undergraduate summer student Guy Banay under my supervision.

SELECTED PRESENTATIONS AND INVITED TALKS

1. “Phylogenetic Error-Correction for Viral Transmission Network Inference”; *Workshop on Computational Advances in Molecular Epidemiology (CAME), Cambridge, USA. August 2017.*
2. “Inferring Microbial Gene Family Evolution Despite Phylogenetic Uncertainty”; *Evolution meeting, Portland, OR, USA. June 2017*
3. “Phylogenetic Uncertainty and Transmission Network Inference: Lessons from Phylogenetic Reconciliation”; *Workshop on Computational Advances in Molecular Epidemiology (CAME), Atlanta, USA. October 2016.*
4. “Deciphering microbial evolution using phylogenetic reconciliation”; *IEEE International Conference on Computational Advances in Bio and Medical Sciences (ICCABS), Atlanta, USA. October 2016. Invited.*
5. “Exact Algorithms for Duplication-Transfer-Loss Reconciliation with Non-Binary Gene Trees”; *ACM Conference on Bioinformatics, Computational Biology, and Health Informatics (ACM BCB), Seattle, USA. October 2016.*
6. “Using Phylogenetic Reconciliation to Decipher Microbial Evolution: Theory and Practice”; *Evolution meeting, Austin, USA. June 2016*
7. “Deciphering Reticulate Evolution Using Phylogenetic Reconciliation”; *Networks in Biological Sciences, Singapore. July 2015. Invited.*
8. “Deciphering Reticulate Evolution Using Phylogenetic Reconciliation”; *Utilizing Genealogical Phylogenetic Networks in Evolutionary Biology: Touching the Data, Leiden, Netherlands. July 2014. Invited.*
9. “Deciphering Microbial Evolution Using Phylogenetic Reconciliation”; *Computational Biology and Bioinformatics Organization meeting, Broad Institute of MIT and Harvard, Cambridge, USA. March 2014. Invited.*

10. “Deciphering Microbial Evolution Using Phylogenetic Reconciliation”; *Biomedical Engineering Seminar, University of Connecticut, Storrs, USA. March 2014.*
11. “Reconciliation Revisited: Handling Multiple Optima when Reconciling with Duplication, Transfer, and Loss”; *International Conference on Research in Computational Molecular Biology (RECOMB), April 2013, Beijing, China.*
12. “Accurate gene tree reconstruction using TreeFix and TreeFix-DTL”; *Symposium and Workshop on New Methods for Phylogenomics and Metagenomics, University of Texas, Austin, USA. February 2013. Invited.*
13. “Reconciliation revisited: Towards faster and more accurate inference of gene family evolution by duplication, transfer, and loss”; *Computational and Statistical Phylogenomics Meeting, Vigo, Spain. September 2012. Invited.*
14. “Efficient Algorithms for the Reconciliation Problem with Gene Duplication, Horizontal Transfer, and Loss”; *International Conference on Intelligent Systems for Molecular Biology (ISMB), July 2012, Long Beach, USA.*
15. “Reconciliation revisited: Towards more accurate inference of gene family evolution”; *Mathematical and Computational Evolutionary Biology (MCEB), June 2012, Montpellier, France.*
16. “Reconstructing gene family evolution by speciation, duplication, horizontal transfer & loss”; *Boston Evolutionary Genomics Supergroup Meeting, August 2011, Cambridge, USA.*
17. “Systematic Detection of Large-Scale Horizontal Gene Transfer Events on the Tree of Life”; *Computer Science Colloquium, Iowa State University, Ames, USA. April 2011. Invited.*
18. “Detecting Highways of Horizontal Gene Transfer”; *RECOMB Comparative Genomics Workshop (RECOMB-CG), October 2010, Ottawa, Canada.*
19. “Inferring Species Trees and Large-Scale Horizontal Gene Transfer from Discordant Gene Trees”; *Computational Biology Group and Laboratory for Microbiology, Massachusetts Institute of Technology, Cambridge, USA. October 2010. Invited.*
20. “Inferring Species Trees and Large-Scale Horizontal Gene Transfer from Discordant Gene Trees”; *Evolutionary Genomics Research Group, NCBI, National Institutes of Health, Bethesda, USA. July 2010. Invited.*
21. “Detecting Highways of Horizontal Gene Transfer”; *Bertinoro Computational Biology Meeting, May 2010, Bertinoro, Italy.*
22. “Detecting Highways of Horizontal Gene Transfer”; *Stringology Research Workshop, May 2010, Tel-Aviv, Israel.*
23. “Genome-Scale Phylogenetic Analyses using Gene Tree Parsimony”; *Asia-Pacific Bioinformatics Conference (APBC), January 2010, Bangalore, India.*
24. “Generalized Binary Tanglegrams”; *International Conference on Bioinformatics and Computational Biology (BICoB), April 2009, New Orleans, USA.*
25. “The Gene-Duplication Problem”; *Computational Genomics Research Group, Tel Aviv University, Tel Aviv, Israel. February 2009. Invited.*
26. “The multiple gene duplication problem revisited”; *International Conference on Intelligent Systems for Molecular Biology (ISMB), July 2008, Toronto, Canada.*
27. “The Gene-Duplication Problem: Near-Linear Time Algorithms for NNI Based Local Searches”; *International Symposium on Bioinformatics Research and Applications (ISBRA), May 2008, Atlanta, USA.*
28. “Heuristics for the Gene-Duplication Problem: A $\Theta(n)$ Speed-up of the Local Search”; *International Conference on Research in Computational Molecular Biology (RECOMB), April 2007, San Francisco, USA.*

TEACHING

Department of Computer Science & Engineering, University of Connecticut, USA.

1. CSE 3502 Theory of Computation: *Fall 2016, Fall 2017*
2. CSE 2500 Introduction to Discrete Systems: *Fall 2015, Spring 2016*
3. CSE 5500 Algorithms (graduate level): *Spring 2015, Fall 2015, Fall 2016, Fall 2017*
4. CSE 3800/CSE 5800/BME 4800 Bioinformatics: *Fall 2014*
5. CSE 3500 Algorithms and Complexity: *Spring 2014*
6. CSE 5095 Approximation, Randomized, and Fixed Parameter Algorithms: *Fall 2013*

STUDENTS

Current lab members:

1. Lei Li (PhD student)
2. Misagh Kordi (PhD student)
3. Lina Kloub (PhD student)
4. Farzaneh Rastegari (PhD student)
5. Soumya Kundu (undergraduate research assistant)
6. Samuel Sledzieski (undergraduate research assistant)
7. Eric van Heel (undergraduate research assistant)
8. Alex Masi (undergraduate research assistant)
9. Hannah Reed (undergraduate research assistant)

Previous lab members:

1. Chengchen Zhang (undergraduate research assistant)
2. Kevin Grabowski (undergraduate research assistant)
3. Maryzyrene Adao (undergraduate research assistant)
4. James Boivie (undergraduate research assistant)

- ACM Conference on Bioinformatics, Computational Biology and Biomedicine (ACM-BCB) 2012
- International Workshop on Data Mining in Bioinformatics (BIOKDD) 2012
- International Conference on Bioinformatics and Computational Biology (BICoB) 2012

Conference/workshop organizing:

- Co-chair for "Inferring Phylogenies and Haplotypes" track of the ACM Conference on Bioinformatics, Computational Biology and Biomedicine (ACM-BCB). August 2017
- Co-organizer and host for "Biogeochemical Dating in Deep Time" workshop. May 2017
- Finance chair for IEEE International Conference on Computational Advances in Bio and Medical Sciences (ICCABS). 2014, 2015, 2016

Selected journal and conference reviewing:

- IEEE/ACM Transactions on Computational Biology and Bioinformatics (TCBB)
- Proceedings of the National Academy of Sciences (PNAS)
- Journal of Computational Biology (JCB)
- Journal of Theoretical Biology (JTB)
- PLoS Computational Biology
- Systematic Biology
- Nature Ecology & Evolution
- Mathematical Biosciences
- Information Processing Letters (IPL)
- Bioinformatics
- BMC Bioinformatics
- Molecular Biology and Evolution (MBE)
- Molecular Phylogenetics and Evolution (MPE)
- Methods in Ecology and Evolution
- BMC Evolutionary Biology
- Journal of Mathematical Biology (JOMB)
- Theoretical Computer Science (TCS)
- Algorithms for Molecular Biology (AMB)
- Cladistics
- Theoretical Population Biology (TPB)
- International Conference on Research in Computational Molecular Biology (RECOMB)
- ACM-SIAM Symposium on Discrete Algorithms (SODA)
- Pacific Symposium on Biocomputing (PSB)
- Combinatorial Pattern Matching (CPM)
- Latin American Theoretical Informatics (LATIN)
- International Symposium on Bioinformatics research and Applications (ISBRA)
- RECOMB Comparative Genomics (RECOMB-CG)
- Workshop on Algorithms in Bioinformatics (WABI)

PROFESSIONAL MEMBERSHIPS

- International Society for Computational Biology (ISCB)
- Society for Molecular Biology and Evolution (SMBE)
- Society of Systematic Biologists (SSB)
- ACM Special Interest Group on Bioinformatics, Computational Biology, and Biomedical Informatics (SIGBio)
