

Post-Doctoral position in Bioinformatics

Applied Algorithmics Lab, UConn

A post-doctoral position in the general area of bioinformatics is open in the Applied Algorithmics Lab at the University of Connecticut.

The post-doctoral candidates should have a strong background in bioinformatics (especially involving algorithms). Familiarity with motif search algorithms will be a plus. They must have received or be very close to getting their PhD's. Publications in relevant Bioinformatics venues are expected.

This position is partially supported by a NIH R01 grant and is open immediately. Interested persons are asked to send a resume to Sanguthevar Rajasekaran (rajasek@engr.uconn.edu). Queries are welcome.
