What is Mold
Mold exposure? When is it a concern?
Why might I get ill?
Who should be concerned?
What symptoms could I develop?
What should I do if I develop symptoms?
What is Personal Protective Equipment/PPE

What do I need to know about PPE before the hurricane?

What do I need to know about PPE after the hurricane?

What do I need to know about PPE while winds still blowing?

Why shouldn’t I use PPE?

Why should I use PPE?

Where do I find PPE?

When should I be concerned over mold?

When should I have help?
This tab could gather information on the type of information they should collect in the beginning of the rebuilding process:
location of the mold in the persons dwelling

Status of the dwelling

Floors of the structure?

Why think about water?

Key lessons

What does (town name)_______ require I do

Resources

You can have another tab with a list of resources that may all be links

Screening questions

Signs and symptoms where it may be prudent to consider hurricane response and mold exposure may be
